

This month

Wow, I can't believe that the end of the school year is quickly approaching. It has been a fantastic school year, and we are so happy to be ending the year with some really fun activities! We will truly miss all of you and your children!!

We will be going on a field trip the last week of school to Miller Park Zoo. All parents are welcome to meet us there for a fun day!! The cost per adult will be \$4.50, but we will need the money in advance so we can pay as a group to get the discounted price.

On May 12th, we will be having a summer birthday celebration to celebrate all children who have birthdays in the summer months.

Summer Birthdays:

Happy 4th Birthday to Hazel on June 9th

Happy 5th Birthday to Maicee on July 22nd

Happy 5th Birthday to Penelope on July 24th

In May, we are looking forward to learning about flowers, things that grow, and we will have a wacky week for the last week of school.

Important Dates

5th Teacher Appreciation Day

6th Mother's Day Slide Show

8th Mother's Day

10th Happy 5th Birthday Emilee

10th Field Trip to Miller Park Zoo

12th Summer Birthday Celebration

18th Head Start's Birthday

19th Policy Council at Family Center 5:30 pm

20th Last Day of School

Something to Try at Home

1. Fill the cup with water (*air*)
2. Add a thin layer of shaving cream (*clouds – water vapor*)
3. Place drops of blue food coloring on the top of the shaving cream (*water droplets*)
4. Wait for the "rain" to fall

For this experiment it is important to remind learners that this activity shows how the water gets heavier on the top of the cloud and gravity makes it fall as rain. Let them know that we use the shaving cream and food coloring to represent the different forms of water we can easily see.

MAKING RAIN science experiment
