

Miss Tammy, Miss Jackie, & Miss Lindi

Our Creative Curriculum for this month is to create a kite, using different shapes. Use a piece of paper and have your child draw or glue shapes on it. The following shapes could be used: a diamond (rhombus), square, circle, oval, hexagon, octagon, pentagon, rectangle, heart, or star. When you are done adding the shapes to your kites, please have your child count all the shapes on the kite and write the number on the back. We want you and your child to work on this together, so they can show their understanding of shapes and practice counting. Have fun!

Child's name _____

Time spent- 15 minutes _____ 30 minutes _____ 1 hour _____

Adult signature _____ Date _____

Staff verification _____ Date verified _____

Early Learning Strands:

Math and Science-Functional Counting, Identifying and Using Shapes

Object Control- Manipulation
