

Miss Debbie & Miss Mary's March Learn At Home Project

This month please take a nature walk with your child as they collect at least enough rocks to represent each letter of their name. After the rocks have been chosen, please have your child write one letter of their name on each rock. If necessary, you can help by writing the letter first and then have them copy it. Then have your child practice placing the rocks in the correct order to spell their name. You might even want to practice spelling other familiar words or names with your child. Also, for added learning, have your child practice counting the number of rocks they have collected. Return the rocks in the bag along with any other rocks collected to leave at school for various activities during the month and the bottom portion of this note.

Thank you,

Miss Debbie and Miss Mary

Child's name: _____

Parent name: _____

Time spent on this project: 15 min, 30 min, 45 min, 1 hour

Parent Signature: _____

Date: _____
